Rational

Currently, there is no way to easily get the link of an activity from the activity stream. When a user wants to bring an activity to the attention of someone, he needs to @mention him. However, since email notifications, we have the Activity Viewer and the ability to have unique urls to display activities out of the context of the stream.

This specification brings this permalinks to the UI for a more convenient way to point to activities.

Requirements

Version	ID	Description
PLF 4.3	ACT_PERMALINK_01	A link icon is always displayed on the top right when the user mouseover an activity. When the activity belongs to the user, the link icon is displayed on the left of the delete icon.
PLF 4.3	ACT_PERMALINK_02	A link icon is always displayed on the top right when the user mouseover a comment. When the comment belongs to the user, the the link icon is displayed on the left of the close icon.
PLF 4.3	ACT_PERMALINK_03	The link icon is available for any activity type.
PLF 4.3	ACT_PERMALINK_04	When clicking the link icon from an activity, the user is taken to the Activity Viewer where this activity is loaded.
PLF 4.3	ACT_PERMALINK_05	When clicking the link icon from a comment, the user is taken to the Activity Viewer, where the activity is loaded with all its comments expanded. The comment which triggered the action is highlighted.
PLF 4.3	ACT_PERMALINK_06	The tooltip of the icon is : View Activity. It must be displayed at the bottom of the icon.
PLF 4.3	ACT_PERMALINK_07	For an Forum activity where a View icon can be displayed on a comment, the icons will be ordered like that : view icon, link icon and close icon.
